EXECUTIVE SUMMARY

The meeting begins with introductions from Jiya, Sumit, and Will. Jiya introduces the topic: RingCentral's AI APIs for conversational intelligence. Sumit elaborates on AI in conversations, highlighting its capabilities beyond basic speech-to-text, such as interaction, sentiment, and emotion analysis, particularly useful in contact center scenarios for understanding call sentiment. Will then describes the different categories of APIs (audio and text-based) and details three popular conversational intelligence APIs: speech-to-text (including punctuation), speaker diarization (identifying who spoke when), and speaker identification (recognizing specific speakers if trained). Jiya.
