Sample.2

Meeting Information

Meeting Title	Sample.2
Date	2026-07-03
Duration	03:58
Participants / Attendees	Speaker 2, jiyaaa, Speaker 4
Prepared By	MeetScribe

EXECUTIVE SUMMARY

The meeting introduces RingCentral's AI APIs, focusing on conversational intelligence. Sumit explains that AI in conversations goes beyond basic speech-to-text, encompassing interaction, sentiment, and emotion analysis, particularly useful for contact centers. Will details the API categories (audio and text-based) and highlights three popular APIs: speech-to-text (for transcription with punctuation), speaker diarization (identifying who spoke when), and speaker identification (recognizing specific speakers if trained). Tom concludes by thanking the speakers and announcing that the program is currently in beta, with a general release planned soon, encouraging.

KEY DISCUSSION POINTS

- Introduction of RingCentral's AI APIs for conversational intelligence.

Timestamp: 00:01 - 00:46 | Speaker(s): Speaker 2, jiyaaa, Speaker 4

- AI in conversations extends beyond basic speech-to-text/text-to-speech to include interaction, sentiment, and emotion analysis.

Timestamp: 01:03 - 01:33 | Speaker(s): jiyaaa

- AI APIs can be used in contact centers to analyze call sentiment, helping supervisors understand incoming calls.

Timestamp: 01:33 - 02:00 | Speaker(s): jiyaaa

- RingCentral supports APIs in two categories: audio APIs and text-based APIs.

Timestamp: 02:20 - 02:50 | Speaker(s): Speaker 4

- Three most popular conversational intelligence APIs are speech-to-text, speaker diarization, and speaker identification.

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

Task	Owner	Due Date	Priority	Status
Stay tuned for the general availability release of the RingCentral AI API program.	Unassigned	N/A	Low	open
Provide feedback on the RingCentral AI API program.	Unassigned	N/A	Low	open
