EXECUTIVE SUMMARY

The meeting begins with introductions from Sumit (Palak) and Will (Vansh), who are colleagues of Tom (Jiya). The main topic is RingCentral's AI APIs for conversational intelligence. Sumit explains that AI in conversations goes beyond basic speech-to-text and text-to-speech, encompassing interaction, sentiment, and emotion analysis. He highlights its utility in contact centers for supervisors to gauge call sentiment. Will then elaborates on the API categories (audio and text-based) and details three popular APIs: speech-to-text (which converts audio to text with punctuation), speaker diarization (identifying who.
