Sample.2

Meeting Information

Meeting Title	Sample.2
Date	2026-06-30
Duration	2 min
Participants / Attendees	Tom, Harry, Sameer
Prepared By	MeetScribe

EXECUTIVE SUMMARY

The meeting introduces RingCentral's AI APIs focused on conversational intelligence. Sameer explains that AI in conversations goes beyond speech-to-text, enabling interaction, sentiment, and emotion analysis, particularly useful for contact centers. Will details the API categories (audio and text) and highlights three popular APIs: speech-to-text (which includes punctuation), speaker diarization (identifying who spoke what), and speaker identification (recognizing trained voices). The program is currently in beta, with plans for a general public release soon, and feedback is encouraged.

KEY DISCUSSION POINTS

- AI in conversations extends beyond speech-to-text/text-to-speech to include interaction, sentiment, and emotion analysis.

Timestamp: 00:42 - 01:01 | Speaker(s): Speaker 2

- RingCentral's AI APIs can be used in contact centers to understand call sentiment levels.

Timestamp: 00:42 - 01:01 | Speaker(s): Speaker 2

- RingCentral supports APIs in two categories: audio APIs and text APIs.

Timestamp: 01:15 - 01:25 | Speaker(s): Speaker 2

- Three most popular conversational intelligence APIs are speech-to-text (with punctuation), speaker diarization (who spoke what), and speaker identification (recognizing trained voices).

Timestamp: 01:25 - 01:48 | Speaker(s): Speaker 2

- The RingCentral AI API program is currently in beta and will soon be generally available to the public.

Timestamp: 01:48 - 02:00 | Speaker(s): Speaker 1

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

Task	Owner	Due Date	Priority	Status
Release the RingCentral AI APIs program generally available to the public	Unassigned	soon	Low	open
