

MINUTES OF MEETING

RingCentral AI APIs for Conversational Intelligence

Meeting Information

Date	2026-06-22
Duration	N/A
Speakers Detected	N/A
Generated By	MeetScribe

EXECUTIVE SUMMARY

Tom introduces Sameer and Will, who discuss RingCentral's AI APIs. Sameer explains how AI in conversations goes beyond basic speech-to-text, enabling interaction, sentiment, and emotion analysis for use cases like contact centers. Will details the two categories of APIs: audio and text-based, highlighting three popular ones: speech-to-text (with punctuation), speaker diarization (identifying who spoke when), and speaker identification (labeling speakers if trained). The program is currently in beta and will soon be generally available.

TOPICS DISCUSSED

- RingCentral AI APIs
- Conversational Intelligence
- Speech-to-Text API
- Speaker Diarization API
- Speaker Identification API
- Interaction Analysis
- Sentiment Analysis
- Emotion Analysis

KEY DISCUSSION POINTS

- **AI in conversations extends beyond basic speech-to-text or text-to-speech capabilities.**
Timestamp: 00:45 - 01:00 | Speaker(s): Sameer
- **RingCentral's AI APIs offer interaction analysis, sentiment analysis, and emotion analysis.**
Timestamp: 01:00 - 01:08 | Speaker(s): Sameer
- **A key use case for these APIs is in contact centers to understand call sentiment levels.**

Timestamp: 01:08 - 01:29 | Speaker(s): Sameer

- **RingCentral supports APIs in two categories: audio APIs and text-based APIs.**

Timestamp: 01:44 - 01:53 | Speaker(s): Will

- **Three most popular conversational intelligence APIs are Speech-to-Text, Speaker Diarization, and Speaker Identification.**

Timestamp: 01:53 - 01:59 | Speaker(s): Will

- **Speech-to-Text API converts audio to text and provides transcripts with punctuation.**

Timestamp: 01:59 - 02:07 | Speaker(s): Will

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

No action items were extracted.

NEXT STEPS

No next steps were identified.
