

MINUTES OF MEETING

RingCentral AI APIs for Conversational Intelligence

Meeting Information

Date	2026-06-22
Duration	4 min
Speakers Detected	3
Generated By	MeetScribe

EXECUTIVE SUMMARY

The meeting, led by Tom, introduces Sameer and Will to discuss RingCentral's AI APIs, focusing on conversational intelligence. Sameer explains that AI in conversations goes beyond basic speech-to-text, enabling interaction, sentiment, and emotion analysis, particularly useful for contact centers to gauge call sentiment. Will elaborates on the API categories (audio and text-based) and highlights three popular APIs: speech-to-text for transcribing audio with punctuation, speaker diarization (referred to as "speaker diaries API") to identify who spoke when, and speaker identification which can name speakers if trained. Tom concludes by thanking Sameer and Will, noting that the program is currently in beta and will soon be released for general availability, encouraging feedback.

Follow-up activities were assigned to the assigned owners, with progress to be tracked through the action items below.

TOPICS DISCUSSED

- RingCentral AI APIs
- Conversational Intelligence
- Speech-to-text API
- Interaction analysis
- Sentiment analysis
- Emotion analysis
- Contact center use cases
- Speaker diarization

KEY DISCUSSION POINTS

- RingCentral's AI APIs are focused on conversational intelligence.

Timestamp: 00:38 - 00:46 | Speaker(s): Speaker 2

- AI in the context of conversations extends beyond speech-to-text to include interaction analysis, sentiment analysis, and emotion analysis.

Timestamp: 01:03 - 01:33 | Speaker(s): Speaker 3

- AI APIs provide significant power for use cases like contact centers, allowing supervisors to understand the sentiment level of calls (e.g., using a 0-5 pointer).

Timestamp: 01:33 - 02:00 | Speaker(s): Speaker 3

- RingCentral supports APIs in two main categories: audio APIs and text-based APIs.

Timestamp: 02:20 - 02:50 | Speaker(s): Speaker 4

- Three popular conversational intelligence APIs include speech-to-text (converting audio to text with punctuation), speaker diarization (identifying who spoke when), and speaker identification (detecting and naming speakers if the AI model is trained).

Timestamp: 02:20 - 03:36 | Speaker(s): Speaker 4

- The RingCentral intelligent APIs program is currently in beta and will soon be generally available to the public.

Timestamp: 03:37 - 03:58 | Speaker(s): Speaker 2

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

Task	Owner	Due Date	Priority	Status
Stay tuned for the general availability release of RingCentral's intelligent APIs program.	Unassigned	N/A	Low	open
Provide feedback on the intelligent APIs program.	Unassigned	N/A	Low	open

NEXT STEPS

- Team will stay tuned for the general availability release of RingCentral's intelligent APIs program.
- Team will provide feedback on the intelligent APIs program.
