

MINUTES OF MEETING

RingCentral AI APIs for Conversational Intelligence

Meeting Information

Date	2026-06-22
Duration	4 min
Speakers Detected	3
Generated By	MeetScribe

EXECUTIVE SUMMARY

The meeting introduces RingCentral's AI APIs focused on conversational intelligence. Sameer explains that AI in conversations goes beyond basic speech-to-text, encompassing interaction, sentiment, and emotion analysis, particularly useful for contact center supervisors to gauge call sentiment. Will details the API categories (audio and text-based) and highlights three popular APIs: speech-to-text for transcribing audio with punctuation, speaker diarization (referred to as "speaker diaries API") to identify who spoke when, and speaker identification which, if trained, can name speakers or label them as Person A, B, C. The program is currently in beta, with plans for a general public release soon, and feedback is encouraged.

Follow-up activities were assigned to the assigned owners, with progress to be tracked through the action items below.

TOPICS DISCUSSED

- RingCentral AI APIs
- Conversational Intelligence
- AI capabilities in conversations
- Speech-to-text API
- Text-to-speech API
- Interaction analysis
- Sentiment analysis
- Emotion analysis

KEY DISCUSSION POINTS

- Introduction to RingCentral's AI APIs for conversational intelligence.

Timestamp: 00:38 - 00:46 | Speaker(s): Speaker 2

- **AI in conversations extends beyond basic speech-to-text/text-to-speech to include interaction, sentiment, and emotion analysis.**

Timestamp: 00:47 - 01:33 | Speaker(s): Speaker 2, Speaker 3

- **AI APIs enable contact center supervisors to analyze call sentiment levels (e.g., using a 0-5 pointer) to understand incoming calls.**

Timestamp: 01:33 - 02:00 | Speaker(s): Speaker 3

- **RingCentral's conversational intelligence APIs are categorized into audio APIs and text-based APIs.**

Timestamp: 02:20 - 02:50 | Speaker(s): Speaker 4

- **The three most popular conversational intelligence APIs are speech-to-text (for transcription with punctuation), speaker diarization (to identify who spoke when), and speaker identification (to name speakers if trained, or label them).**

Timestamp: 02:20 - 03:36 | Speaker(s): Speaker 4

- **The RingCentral intelligent APIs program is currently in beta and will soon be released generally available to the public.**

Timestamp: 03:37 - 03:58 | Speaker(s): Speaker 2

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

Task	Owner	Due Date	Priority	Status
Stay tuned for the general availability release of RingCentral's intelligent APIs.	Unassigned	N/A	Low	open
Provide feedback on the RingCentral intelligent APIs beta program.	Unassigned	N/A	Low	open

NEXT STEPS

- Team will stay tuned for the general availability release of RingCentral's intelligent APIs.
- Team will provide feedback on the RingCentral intelligent APIs beta program.
