

MINUTES OF MEETING

RingCentral AI APIs for Conversational Intelligence

Meeting Information

Date	2026-06-22
Duration	4 min
Speakers Detected	3
Generated By	MeetScribe

EXECUTIVE SUMMARY

The meeting introduces RingCentral's AI APIs for conversational intelligence. Sumit explains that AI in conversations extends beyond basic speech-to-text and text-to-speech, enabling advanced interaction, sentiment, and emotion analysis, which is particularly useful for contact centers to gauge call sentiment. Will details the two categories of APIs: audio and text-based. He highlights three popular APIs: speech-to-text for transcribing audio with punctuation, speaker diarization for identifying who spoke when in a multi-person conversation, and speaker identification which, if trained, can name the specific speaker. The program is currently in beta, with plans for a general release and a call for public feedback.

Follow-up activities were assigned to the assigned owners, with progress to be tracked through the action items below.

TOPICS DISCUSSED

- RingCentral AI APIs
- Conversational intelligence
- Open platform
- Speech-to-text
- Text-to-speech
- Interaction analysis
- Sentiment analysis
- Emotion analysis

KEY DISCUSSION POINTS

- The meeting's topic is RingCentral's AI APIs around conversational intelligence.

Timestamp: 00:38 - 00:46 | Speaker(s): Speaker 2

- **AI in the context of conversations goes beyond speech-to-text and text-to-speech, offering capabilities like interaction, sentiment, and emotion analysis.**

Timestamp: 01:03 - 01:33 | Speaker(s): Speaker 3

- **AI APIs can be used in contact centers for sentiment analysis, allowing supervisors to understand the sentiment level of incoming calls.**

Timestamp: 01:33 - 02:00 | Speaker(s): Speaker 3

- **RingCentral supports APIs in two categories: audio APIs and text-based APIs.**

Timestamp: 02:20 - 02:50 | Speaker(s): Speaker 4

- **Three popular conversational intelligence APIs include speech-to-text (converting audio to text with punctuation), speaker diarization (identifying who spoke when), and speaker identification (naming speakers if trained).**

Timestamp: 02:20 - 03:36 | Speaker(s): Speaker 4

- **The intelligent APIs program is currently in beta and will soon be generally available to the public.**

Timestamp: 03:37 - 03:58 | Speaker(s): Speaker 2

DECISIONS TAKEN

No decisions were extracted.

ACTION ITEMS

Task	Owner	Due Date	Priority	Status
Work toward releasing RingCentral's intelligent APIs generally available to the public.	Unassigned	N/A	Low	open
Provide feedback on the RingCentral intelligent APIs beta program.	Unassigned	N/A	Low	open

NEXT STEPS

- Team will work toward releasing RingCentral's intelligent APIs generally available to the public.
- Team will provide feedback on the RingCentral intelligent APIs beta program.
